INTO THE Ai Ocean

StockSense

Presented by: OceanBlue

ARE YOU A

WearHouse Manager?

Business Owner?

The Problem

Voice of Target Users

I only know a product is running out when it is already too late.

I am not sure how much stock I really have.

I don't know when or how much I should reorder.

I may not notice products that will expire soon.

Who Hurts

- SME Food Manufacturers/ Distributors
- Warehouse Manager
- Business Owners

The Solution

Track

Track current stock, batches, and expiry dates.

Know your Stock!
Predict Risks ~ Act Early.

Recommend

Get suggestions on what to reorder and when.

Predict

Detect low-stock, overstock, and expiry risks.

Alert

Get alerts for stock shortages and expiring items.

How It Works?

Why Now? Why AI?

Before

Manual & Reactive

- Manual stock updates
- Time-consuming stock checks
- Problems found too late
- Decisions based on past records

Now

Automated & Proactive

- Easy stock data upload
- Early stock risk detection
- Expiry and stockout alerts
- AI-power action recommendations

Why StockSense?

- ✓ Simple and easy to use
- ✓ Built for global market
- ✓ Helps you track stock, sales and orders
- ✓ Saves time and reduces mistakes
- ✓ Affordable for SME businesses

Our Unique Value Proposition

StockSense makes inventory simple, smart, and local – so you can focus on growing your business.
